## 7.2 – Best Practices

#### 7.2.1 – Describe at least two institutional best practices

<p><b>Best Practices 2019-2020</b></p> <p>1. Title- Preparation and distribution of notebooks through paper waste Objective The aim of this practice was to make the optimum use of the paper partially used by the students as well as the office workers. It was also intend to sensitize the stockholders towards the use of paper adopting ecologically sustainable practices the practices. The practice also helped the spread on and trades on and around the campus the legitimacy o of the document on used papers. It encouraged and gave to the students. It</p>
---

develops a sense of learning, earning through the waste. Now waste was not waste. Context- Every academic year begins with the use of paper. The office, the staff members, the admission process the job of ----- list etc. are using paper on a large scale. The college correspondence with University, government offices and even the notebooks of the students, assignment, books of every student every year create a huge hip of paper waste. Still we are enough sensible regarding the use of paper which is not only costly but also affects our environment. Number of printings of papers, question papers and answer sheets in a college examination is common source of paper waste. We have the system of economic audit and power audit but no paper audit in school or colleges. Hundreds of reams of paper are used by students and teacher and office workers. In such cases only one side of paper is used for writing or printing and the other side of paper side remains unused. All the assignments books of students kept aside has a record for the three years. And many times it is either destroyed or sold. But this year with the help of N.S.S coordinator we worked for this practice. The used assignments books one side printed papers from office and library were collected. And all paper was sorted out with the help of NSS volunteers and one side plank for papers where collected and all the students prepare a small notebooks for the waste. All these notebooks where distributed among the needy students as well as poor and needy students of Melghat rural villages in our college visit to Melghat. In a way the institution has saved the waste of both natural resources and money. We feel that this one is a small attempt toward the safety and conservation of our environment.

2. Title-Distribution of educational things to students of 'Melghat' Goal: Meet and exceed the institutional vision and mission to inculcate among students the social empowerment. Objective Every institute aims to implement innovative practices. But while doing so we feel that 'there is a need of sharing'. And this sharing attribute must be the quality also among the students. We have to inculcate that attribute slowly but steadily among the faculty member and students, who are the pillars of the society. This future generation must have that sensitivity of mind when he will be projected among such people, who are deprived off educational needy things, to make themselves more social and sensitive in the life. Practice Our institution has made practice to visit the most remote area of 'Melghat' (Tribal area in Vidarbha of Maharashtra) and enjoy a day, among those people, students and children who are really deprived off social and educational needy things. No doubt, our poor help is not going to transform or upgrade their social status but as we are concerned about our sons and students about education, we did make it a grand resolution to upgrade their educational standard by 'sharing educational kits' to those needy students. Since the area is very remote, most of the students are not able to go to schools and most of them cannot afford it. So this year our institution has made a different plan. We visited the village 'Lavada' with educational kits and distributed among these students books, notebooks, slates, pens and pencils. Apart from it, we also shared some picture-books and our experiences with those little ones. The success of this practice or project maybe less in percentage but the graf of happiness and joy, which we saw on faces of those little ones, is really higher than the number of students in the project. The number will defiantly increase in the coming years.

Problems- 1. Less number of students. 2. Parents not serious about their education.

### 7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

**Institutional Distinctiveness** The Institution always work to fulfil its vision and mission in the following manner. For overall development of the students, they are being trained and supported by the various department activities. Along with the basic knowledge of the subject and degree, they are physically trained by the Dep't of sports and games. The N.S.S. Dep't creates a sense of social responsibility among the students. The dep't of commerce instructs him the basic knowledge of banking sector. The industrial tours are one of the aspects of it, similar the historical tour imbibes in their minds. Dep't of Marathi and English bring the harmony of life through the teaching of literature. In short the betterment of mankind is the target of the institution health awareness programme in rural area. More that 50 of area in our country is occupied by rural area. After having 70 years of Independence still we are not able to create a lively and active health awareness among the minds of rural area people. Our institution has kept in mind that instead of visiting any picnic spot anywhere at least a day will be reserved for those people who are still deprived for health related issues and needs. The main object of this practise is to reach the distantly located areas to meet them who have a world with them to know the problems and needs of those people the distribution of things or need things is not only the demand or requirement of those people. They are lacking the basic needs of health. They are not properly made aware of their health. They are not health conscious and that is the real need of today. With this objective the institution has planned to visit a remote area of Melghat and to create the basic principle of life i.e health. Life is a path of problem and difficulties and so also every social work is not without some challenges. Language barrier is the greatest challenges in this activity. The institution has a family has accepted it. In the selected rural area, the people are having their own rural language which is not understood by the staff members is a tool of communication And without it one not reach the hearts of the people. In such cases, we took the help of the local person who was able to separate and understand both the language and through his hap we sorted the problem. But we since it was a temporary adjustment and so it is necessary for us to learn the language of the people. In the most of the practices an attempt is made to up lift the material life of the people but hat dose not really work. Today up liftmen of man with mind, spirit is eventually more important rather than materialistic life. The people of rural area must be made aware of their health. They must be taught good and hygienic practices in their day to day life. Such learned and educated people
